

Table of Contents

Chapter 1: Interactions and Energy Page

Activity 1: Measuring Speed	1-3
Activity 1 Homework: Ideas about Learning Science ◇	1-17
Activity 2: Motion and Energy	1-21
Activity 2 Homework: More on Scientific Explanations	1-39
Activity 3: Another Contact Interaction	1-45
Activity 4: Slowing and Stopping	1-55
Activity 4 Homework: More on Contact Interactions	1-69
Activity 5: Warming and Cooling	1-73
Activity 5 Homework: Interactions with the Surroundings	1-85
Activity 6: Keeping Track of Energy	1-91
Activity 6 Homework: Energy Conservation and Friction	1-107
Activity 7: Explaining Phenomena using Energy Ideas	1-111

Chapter 2: Interactions and Forces Page

Activity 1: Interactions and Force	2-3
Activity 2: Motion with a Continuous Force	2-15
Activity 2 Homework: Pushing a Skateboarder	2-29
Activity 3: Pushes and Slowing Down	2-35
Activity 3 Homework 1: Combinations of Forces	2-51
Activity 3 Homework 2: Children's Ideas about Force and Motion ◇	2-65
Activity 4: Children's Ideas about Force, Motion and Energy ◇	2-69
Activity 4: Transcript	2-73
Activity 5: Friction and Slowing	2-75
Activity 5 Homework: Children's Ideas about Friction ◇	2-87
Activity 5 Homework: Transcript	2-93
Activity 6: Changing Force-Strength and Mass	2-99
Activity 6 Homework: Changing Direction	2-115
Activity 7: Motion with Balanced Forces	2-127
Activity 8: Explaining Phenomena using Force Ideas	2-141

Chapter 3: Interactions and Systems Page

Activity 1: Magnetic Interactions	3-3
Activity 1 Homework: More on Magnetic Interactions	3-17
Activity 2: Electric Charge Interactions	3-27
Activity 2 Homework 1: Interactions Between Charged and Uncharged Objects ...	3-41
Activity 2 Homework 2: Observations and Models ◇	3-49
Activity 3: Gravitational Interactions	3-53
Activity 3 Homework: Using Energy and Force Ideas	3-63
Activity 4: Strength of the Gravitational Force	3-69
Activity 5: Explaining Phenomena--Magnetism, Electric Charges and Gravity	3-89

Chapter 4: Model of Magnetism **Page**

Activity 1: Experiments with Magnetism	4-3
Activity 2: Initial Model for Magnetism	4-15
Activity 3: Better Model for Magnetism	4-29
Activity 3 Homework: Behavior of a Collection of Magnets	4-55
Activity 4: Explaining Phenomena Involving Magnetism	4-53
Activity 4 Homework: The Nature of Science ◊	4-61
Activity 5: Historical Development of a Model of Magnetism	4-71
Activity 5 Homework: Children’s Ideas about Magnetism ◊	4-77
Activity 5 Homework: Transcripts	4-83
Activity 5 Homework: Pictures	4-93

Chapter 5: Electric Circuit Interactions **Page**

Activity 1: Electric Circuit Interactions.....	5-3
Activity 2: Electric Circuits and Energy	5-19
Activity 2 Homework: Multi-Bulb Circuits and Energy	5-41
Activity 3: Electric Circuits and Current	5-47
Activity 3 Homework: Multi-Bulb Circuits and Electric Current.....	5-69
Activity 4: Short Circuits.....	5-79
Activity 4 Homework: Children’s Ideas about Electricity ◊	5-91
Activity 4 Homework: Transcripts	5-97
Activity 5: Energy Conservation and Efficiency	5-103
Activity 6: Explaining the Wake-Up Machine	5-115

Chapter 6: Light Interactions **Page**

Activity 1: Shiny Surfaces and Seeing.....	6-3
Activity 1 Homework 1: Mirrors.....	6-19
Activity 1 Homework 2: Children’s Ideas about Light ◊	6-25
Activity 2: Children’s Ideas about Light and Vision ◊	6-29
Activity 2 Homework: Ideas about Learning Science ◊	6-47
Activity 3: Non-Shiny White and Black Surfaces	6-49
Activity 3 Homework: Refraction of Light.....	6-65
Activity 4: Light and Color	6-73
Activity 4 Homework: Social Scientists’ Ideas ◊	6-85
Activity 5: Explaining Phenomena Involving Light and Color	6-89

Appendices **Page**

How to use the Student Resources DVD	A-3
How to use the Motion Sensor with Data Studio	A-5
How to use the Motion Sensor with Logger Lite.....	A-9
How to use the Motion Sensor with Logger Pro Version 2.....	A-13
How to use the Motion Sensor with Logger Pro Version 3.....	A-17
How to Use the PET Simulators	A-21

- ◊ These activities and homework exercises focus on *Learning about Learning* issues (nature of science, elementary students’ ideas, or PET students’ learning), and may include readings, video transcripts, and students’ drawings.
